DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 20 and 33 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Foster et al (5,967,462).

See especially Figures 1, 2, and 6.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 23 and 24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Foster et al in view of Nichols, Sr.

Foster et al disclose substantially all claimed elements, including an aircraft with a tube member connected to an onboard tank, where the tube is movable into a downward orientation for accessing a fluid source. Foster et al fail to show the aircraft as a helicopter or the fluid source as containing salt water. Nichols, Sr. teach that it is known to use helicopters to collect water through a tube into a tank, in order to fight fires. Motivation to combine is the mere substitution of one type of aircraft for another, in order to perform the same function. To employ the teaching of Nichols, Sr. on the device of Foster et al and have a helicopter as the aircraft is considered to have been obvious to one

having ordinary skill in the art. Also, to collect the water from a source that contains saltwater is considered to have been obvious to one having ordinary skill in the art, since saltwater will clearly function in exactly the same manner as fresh water and would be used if available by one of ordinary skill in the art.

5. Claims 1-12, 14-19, 25-29, 31, and 32 are allowed.

6. Claims 21 and 22 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
